About the GBTP

The successful transition to a green economy is crucial for Latin America and the Caribbean to mitigate climate change and better hedge against increased climate risks. This process will require substantial annual investments of between USD 40-50 billion in the region through 2030. Green bonds emerged as an impactful instrument to finance climate change-relevant investments. As the green bond market expands, investors are demanding greater transparency and comparability in evaluating such instruments and requesting responses to questions such as: **Who are the issuers of green bonds? What type of projects are being financed? What is the overall impact of an investment?**

Making it easy to find the data in one place, in an organized comparable and reliable manner, was a necessity. Harmonization and consistency in reporting is also an important factor in the green bond market. The Inter-American Development Bank (IDB) developed in 2021 the Green Bond Transparency Platform (GBTP): an innovative digital tool that supports the harmonization and standardization of green bond reporting efforts in Latin America and the Caribbean to promote green investments by facilitating green bond issuance.

WHO WE ARE

The GBTP is a free and public tool developed by the Inter-American Development Bank to help bring more transparency and comparability in green bond reporting in Latin America and the Caribbean to increase investors' confidence and attract long-term capital to the region.

WHAT WE DO:

The GBTP provides granular, comparable, and easy to access data on the use of proceeds and environmental impact of the green bonds, uploaded by the issuers, reviewed by independent verifiers and aligned with international standards.

WHY WE DO IT:

The GBTP aims to provide a benchmark to best practice disclosure and support to all market actors. It facilitates the baseline statistics to support investors and regulatory decisions and builds capacity among issuers and investors.

GBTP Achievements

- In its first year, it has been utilized 50,000, covering ~80% of the region's market (USD 26.6 billion) by May 2022
- ~ 200 KPI's aligned to international standards and adjusted to issuer's demands
- ~ 25.9 million tCO2 avoided or reduced (by May 2022)
- More than 80 regional issuers have voluntarily joined the Platform
- More than 320 issuers' personnel trained
- Continuous updating process adding issuers and external reviewers, and features based on market feedback
- Public database easy to download including green and sustainable bonds with use of proceeds and impact metrics
- Open accessible system design allowing replicability in other regions and type of bonds

Did you know? The GBTP was awarded "Initiative of the year - Green Bond 2022" by Environmental Finance. Commended by the judges for promoting comparability in impact reporting from multiple issuers and praised it for a focus on emerging markets countries.

Players of the GBTP

Users Support Team (UST): The support team is responsible for following up the publications, offering all the necessary support from the use of the platform, to helping to verify the consistency of the data informed in the spreadsheets. The support team can serve users throughout Latin America, with native employees who are fluent in Portuguese, Spanish, and English. Sessions to solve doubts and follow-up on publications can be scheduled at no cost to the user. The GBTP offers a great tool for users (investors, asset owners etc) an opportunity to engage with the issuer by providing the user support team with their questions

IDB Team: Above the support team, the IDB offers close and accessible support. This team is responsible for the overall platform vision, coordinating all technical, programming, communications and operations teams. The IDB team responsible for the platform can also be reached through the support channels.

Communications: The platform has a dedicated communications team, which organizes the publications related to the platform's work and guides users on how and what to publish with reference to the platform. The team is responsible for preparing our monthly newsletter, which consolidates the main milestones and actions of the platform.

Operations LAC: The LAC operations team has bases in Brazil, Colombia, and Argentina, and is responsible for servicing all countries in Latin America and the Caribbean.

Issuers: The issuer is the organization that issues the debt security. It has free access to the platform and is encouraged to publish all the information that is already publicly available. The issuer can also request external review through the platform. All green bond issuers in Latin America are encouraged to minimally publish the mandatory information, which requires only a few minutes of dedication. In addition to the mandatory information, there is space on the platform for them to publish their projects, KPIs, allocations, frameworks, among other documents that will be of interest to investors and users in general of the platform.

External Reviewer: External reviewers can also participate in the platform for free. They receive the request from the issuers to confirm the published data and can do this through the platform. All external reviewers in the market are encouraged to register on the platform and keep an eye out for new issues that have been published. The external reviewer provides verification for pre- and post-issuance SPOs, ratings, allocation proceeds and impact metrics verification, as well as certifications.

Investor: The GBTP can provide a one-stop platform for investors with more comparable data of existing issues, which was previously unstructured, not standardized and scattered across various platforms and institutions with heterogeneous reporting. Investors do not need to log in to consult the securities or build their portfolio on the platform, access to information is simple and free for everyone. The virtual portfolio is stored on the client side only, does not preserve or communicate it to the server and bonds are selected directly in the platform, no external file is imported.

Supporters: The supporters are the organizations that promote the dissemination of the platform and encourage its use. There is no cost to be a supporter, there is only the commitment to be available in case of need for consultation for improvement of the environment, as well as help in disseminating the work of the platform to their customers. To learn more about how to become a supporter, please contact our team.

Did you know? The GBTP already covers almost 90% of the green bonds in Latin America and the quality and reliability of the available data was cited as a highlight by the judges at the Environmental Finance awards.

00

00. Home screen and dashboard

Getting to know the platform

Identifying the components of the front page

Number of countries where projects are financed by the bonds

Aggregated disbursements to all projects financed by the bonds

Dynamic map with aggregate data at the country-level. Click on the various countries to drill down on one specifically

Total number of bonds published on the platform, with basic or complete data

Total USD volume issued in green and sustainability bonds published on the platform

Aggregated impact metric of all projects financed by the bonds

The average time of the bonds in the platform to mature in years

Action required: **browsing**

Access the platform via www.greenbondtransparency.com (you can use the QR Code on the side) and read the terms and conditions to the end to accept. When accessing the home screen, a dashboard with the consolidation of the information present in the GBTP is displayed. As uploads are made by the issuers, the dashboard is updated automatically. The dashboard shows the Latin America view, highlighted on the navigable map to the right.

00

00. Home screen and dashboard

Getting to know the platform

Identifying the components of the front page

Buttons to display the project categories financed based on the different existing standards:
 GBP: Green Bond Principles of ICMA
 CBI: Climate Bond Standards
 EU GBS: European Union Green Bond Standards
 ISO: Environmental performance evaluation – Green debt instruments
 Users will find the distribution based in the framework used by the issuer.

The chart shows the distribution of the disbursements amount to different project categories using different taxonomies, measuring by total volume and number of projects financed available in the platform

Action required: **browsing**

By clicking or moving the mouse on hover of the category, the number of project-by-project category and the volume in USD directed to this type of projects will be displayed. The chart is also updated automatically as new data is entered into the platform by issuers.

00

00. Home screen and dashboard

Getting to know the platform

Identifying the components of the front page

Extensive list of bonds published on the platform. A list with filters for finding more easily the bonds is presented ahead

Tag for bonds issued less than 18 months ago

Bonds issued less than 12-18 months ago often do not have allocations or impact report available. These bonds often report in the platform the general data and will update the date in the forthcoming months

Action required: **browsing**

This part of the home screen shows the list of the issuances that are on the platform. The platform is a voluntary environment where issuers can enter all publicly available information about their emissions free of charge. The platform does not insert emissions data, the commitment to transparency is of the issuer itself. If there are issues that are not published yet, please contact the issuer and the GBTP team for a recommendation: support@greenbondtransparency.com

01. Bonds search and filters

Bonds on the platform

Getting to know the GBTP filters

The screenshot shows the 'GREEN BOND TRANSPARENCY PLATFORM' interface. At the top, there is a navigation bar with 'Bonds', 'Portfolio 2', 'FAQ', 'Profile', 'About Us', and 'Resources'. A search bar is located on the right. The main heading is 'Bonds'. Below it, there is a 'FILTER BY' section with a search input field and a list of filter categories: ISSUER LOCATION, CATEGORY, ISSUER TYPE, CURRENCY, INDICATORS, ISSUANCE YEAR, EXTERNAL REVIEW, STOCK EXCHANGE, PROGRAMS, MATURED, and BOND THEME. A red box highlights these filter categories, with an arrow pointing to them labeled 'Filter options'. Below the filters, there is a grid of country options: Argentina, Barbados, Brazil, Chile, Colombia, Costa Rica, Ecuador, Mexico, Panama, Paraguay, Peru, and Supranational. Further down, there are five performance metrics cards: Energy (24.11m MWh renewable energy generation, 0% EXTERNALLY REVIEWED), Greenhouse Gas (32.18m tCO2e avoided, 0% EXTERNALLY REVIEWED), Energy (9.74m tCO2e reduced, 0% EXTERNALLY REVIEWED), Energy (49.99k MW installed capacity, 0% EXTERNALLY REVIEWED), and Greenhouse Gas (294.4m # passenger, 0% EXTERNALLY REVIEWED). At the bottom, there is a table with columns: TICKER, COUNTRY, ISSUER & TYPE, VOLUME, and MATURITY & ISSUANCE. The table shows one entry: PAL3009913F1 (ISIN), Panama, Corporación Interamericana para el Financiamiento de Infraestructura (CIFI) Financial Corporate, USD, and 28 Feb 23 (26 Feb 20) with an 'Add' button.

Action required: know the filters

You can use the available filters for your search. The platform is organized to allow a fast and consistent search, with an unbeatable amount of information. Browse with the filters according to specific interest. Add more than two filters to see bonds with specific characteristics. Click the filters to add them and click over the options selected to remove them.

01

01. Bonds search and filters

Bonds on the platform

Using the filters

The screenshot shows the 'Bonds' page on the Green Bond Transparency Platform. The header includes navigation links: Bonds, Portfolio², FAQ, Profile, About Us, Resources, and Actions. A search bar is located at the top right. Below the header, the 'Bonds' section features a 'FILTER BY' menu with options: ISSUER LOCATION, STOCK EXCHANGE, CATEGORY, PROGRAMS, ISSUER TYPE, MATURED, CURRENCY, BOND THEME, INDICATORS, ISSUANCE YEAR, and EXTERNAL REVIEW. A red box highlights the 'ISSUER LOCATION' filter, which lists countries: Argentina, Barbados, Brazil, Chile, Colombia, Costa Rica, Ecuador, Mexico, Panama, Paraguay, Peru, and Uruguay. A black arrow points to this list with the text 'Search by country'. Below the filters, there are five performance metrics cards: Energy (24.11m MWh renewable energy generation, 0% EXTERNALLY REVIEWED), Greenhouse Gas (32.18m tCO2e avoided, 0% EXTERNALLY REVIEWED), Energy (9.74m tCO2e reduced, 0% EXTERNALLY REVIEWED), Energy (49.99k MW installed capacity, 0% EXTERNALLY REVIEWED), and Greenhouse Gas (294.4m # passenger, 0% EXTERNALLY REVIEWED). At the bottom, a table lists a bond with the following details:

TICKER	COUNTRY	ISSUER & TYPE	VOLUME	MATURITY & ISSUANCE
PAL3009913F1 ISIN	Panama	Corporación Interamericana para el Financiamiento de Infraestructura (CIFI) Financial Corporate	USD	28 Feb 23 26 Feb 20 Add

Country of jurisdiction of the reporting issuer

Search by country

Action required: know the filters

Issues can be searched by country. These are the countries that are currently present in the platform, which has coverage for all Latin America and the Caribbean. Add more than two filters to see bonds with specific characteristics. Click the filters to add them and click over the options selected to remove them.

Brazil	Banco BV S.A. Financial Corporate	416.7M BRL 82.8M USD	16 Jun 27 18 Jun 21 Add

Action required: **know the filters**

A **bond program** is a structure when multiple bonds are used by issuers as funding sources for a group of projects. These bonds may have different parameters (such as the volume, tranches, markets...) yet their proceeds are accumulated in one "pot" or fund which is then used to finance projects. Add more than two filters to see bonds with specific characteristics. Click the filters to add them and click over the options selected to remove them.

Bond name and ISIN code

In 2019, Klabin became the first Brazilian company to issue a security in this category with a maturity of 30 years (Notes 2049). These emissions reinforce Klabin S.A.'s commitment and social and environmental performance in Brazil, demonstrating its pioneering spirit in sustainability practices. On January 15, 2020, the Company reopened (retap) the issuance of 2049 Notes, to raise additional US\$ 200 million.

Individual bonds that are part of the program and add-up to the total issuance volume

The total USD volume disbursed to projects using the aggregated proceeds of the bonds in the program.

Project-by-project disbursements for the group of bonds – All bonds will have the same information

Action required: opening a bond program

A **bond program** is a structure when multiple bonds issued by the same issuer are used as funding sources for a group of projects. These bonds may have different parameters (such as the volume, currencies, tranches, markets...) yet their proceeds are accumulated in one “pot” or fund which is then used to finance a series of projects. Thus, the disbursements of the bonds are reported aggregated at the program-level and not on a one-by-one basis at the bond-level. Therefore, it is not possible to determine how much was disbursed from each bond, instead the platform shows how much was disbursed from the totality of the program. Additionally, the impact metrics are measured for the group of projects and are linked to the program itself and not to each individual bond.

Calango 6 is an 84 MW wind generation facility located in the rural areas of the municipalities of Bodó and Lagoa Nova, Rio Grande do Norte state. It is composed of three wind farms with 42 wind turbines in total and produces enough electricity to power up approximately 220,000 households. Calango 6 construction work is finished. The wind farms have been operational since December 2016.

04. Portfolio organization

Build your portfolio

Organize your portfolio

The screenshot shows the Green Bond Transparency Platform interface. At the top, there is a navigation bar with 'Bonds' and 'Portfolio 2' tabs. A callout box points to the 'Portfolio 2' tab with the text '# of Bonds will be shown here'. Below the navigation bar, there is a grid of country filters including Argentina, Barbados, Brazil, Chile, Colombia, Costa Rica, Ecuador, Mexico, Panama, Paraguay, Peru, Uruguay, and Supranational. The 'Brazil' filter is selected. A modal window is open, displaying details for a bond: 'Bond USL79090AC78(ISIN) Rumo S.A.'. The modal contains two input fields: 'ISSUANCE VOLUME' with the value '500,000,000 USD' and 'YOUR INVESTMENT' with the value '100,000 USD'. Both input fields are circled in red. A callout box points to the 'YOUR INVESTMENT' field with the text 'Enter the amount'. At the bottom of the modal, there is a button labeled 'Add to portfolio' with a callout box pointing to it that says 'Click to ADD'. The background shows a list of bonds with columns for 'Energy', 'MWh', '0% EXTERNALLY REVIEWED', 'TICKER', 'Maturity & Issuance', and 'Add' buttons.

Action required: inform the amount and add to portfolio

By clicking ADD, the system will ask to enter a simulated investment in USD. Enter the amount and click on the highlighted button to add it to the portfolio.
